

The Future of NAEP

Goal

The purpose of this session is for Board members to discuss opportunities to improve the quality, relevance, efficiency and utility of the design, content, and reporting of NAEP for 2030 and beyond.

Overview

Lesley Muldoon will share preliminary plans for this work with members for their feedback and discussion.

Background

In November 2023, the Board approved Strategic Vision 2030, with a focus to inform, engage and innovate to strengthen the Nation's Report Card to enable leaders to improve student achievement for all.

While NAEP contracts were recently finalized, it is already time to start preparing for the next round of contracts.

In order for the Board to fulfill its legislatively mandated responsibilities in alignment with the strategic vision, it must continuously evaluate the current environment to identify opportunities and challenges for the program.
